Author index to volume 133 (1994)

Abhyankar, S.S. and I. Yie, Small degree coverings of the affine line in characteristic two (1–3) 1– 23
Abhyankar, S.S., J. Ou and A. Sathaye, Alternating group coverings of the affine line for characteristic two (1–3) 25– 46
Alzer, H., An inequality for increasing sequences and its integral analogue (*Note*) (1–3) 279–283
Assaf, A.M., Bipacking pairs by quintuples: The case $v \equiv 13 \pmod{20}$ (1–3) 47– 54
Barnes, F.W., How many $1 \times 2 \times 4$ bricks can you get into an odd box? (1–3) 55– 78
Cerlienco, L. and M. Mureddu, Generalized Robinson–Schensted correspondences: A new algorithm (1–3) 79– 88
Check, P.L. and C.J. Colbourn, Concerning difference families with block size four (*Note*) (1–3) 285–289
Colbourn, C.J., see P.L. Check (1–3) 285–289
Ellingham, M.N., R.L. Hemminger and K.E. Johnson, Contractible edges in longest cycles in non-Hamiltonian graphs (1–3) 89– 98
Geyer, W., On Tamari lattices (1–3) 99–122
Hemminger, R.L., see Ellingham, M.N. (1–3) 89– 98
Hsu, D.F. and T. Łuczak, On the k-diameter of k-regular k-connected graphs (*Note*) (1–3) 291–296
Hughes, R.B., Lower bounds on cube simplexity (1–3) 123–138
Ivashchenko, A.V., Some properties of contractible transformations on graphs (1–3) 139–145
Jackowski, Z., Characterizations of two classes of digraphs (1–3) 147–157
Jiang, M. and F. Ruskey, Determining the Hamilton-connectedness of certain vertex-transitive graphs (1–3) 159–169
Johnson, K.E., see Ellingham, M.N. (1–3) 89– 98
Kimura, H., Classification of Hadamard matrices of order 28 (1–3) 171–180
Klavžar, S. and U. Milutinović, Strong products of Kneser graphs (*Note*) (1–3) 297–300
Klein, R., On the colorability of m-composed graphs (1–3) 181–190
Kratochvil, J., Regular codes in regular graphs are difficult (1–3) 191–205
Li, A., On the conjecture at two counterfeit coins (*Note*) (1–3) 301–306
Łuczak, T., see Hsu, D.F. (1–3) 291–296
Manoussakis, Y., see Zhang, K.M. (1–3) 325–328
Mendelsohn, E. and P. Rodney, The existence of court balanced tournament designs (1–3) 207–216
Milutinovic, U., see Klavžar, S. (1–3) 297–300
Mureddu, M., see Cerlienco, L. (1–3) 79– 88
Ou, J., see Abhyankar, S.S. (1–3) 25– 46
Rasmussen, D.J. and C.D. Savage, Hamilton-connected derangement graphs on S_n (1–3) 217–223
Rodney, P., see Mendelsohn, E. (1–3) 207–216
Ruskey, F., see Jiang, M. (1–3) 159–169
Sathaye, A., see Abhyankar, S.S. (1–3) 25– 46
Savage, C.D., see Rasmussen, D.J. (1–3) 217–223
Schmerl, J.H., Tiling space with notched cubes (1–3) 225–235
Schroeder, M.J., Dependence systems with the operator–image exchange property (1–3) 237–248
Shi, Y., The number of cycles in a hamilton graph (1–3) 249–257
Snevily, H.S., The snake-in-the-box problem: A new upper bound (*Note*) (1–3) 307–314
Song, Z.M. and K.M. Zhang, Neighborhood unions and Hamiltonian properties (*Note*) (1–3) 319–324
Song, Z.M., see Zhang, K.M. (1–3) 325–330
Uhrin, B., The set of neighbours of a set in a point-lattice (1–3) 259–266

Xu, J.-M., A sufficient condition for equality of arc-connectivity and minimum degree of a digraph (*Note*) (1–3) 315–319
Xu, S., Classes of chromatically equivalent graphs and polygon trees (1–3) 267–278
Yie, I., see Abhyankar, S.S. (1–3) 1– 23
Zhang, K.M., Y. Manoussakis and Z.M. Song, Complementary cycles containing a fixed arc in diregular bipartite tournments (*Note*) (1–3) 325–328
Zhang, K.M., see Song, Z.M. (1–3) 319–324
